

SLEEP TITE[®] CARE INSTRUCTIONS

MACHINE WASHING

- Pre-wash the pillow protector before first use.
- Wash in cold to hot water. Do not exceed a water temperature of 120 degrees.

DETERGENT

- Use a mild liquid detergent, preferably non-alkaline, without added bleach or whiteners.
- Do not pour detergent directly on the pillow protector. Instead, add it to the water as the wash tub fills or dilute with water, then add the pillow protector.

DRYING

- Line drying recommended.
- Tumble dry on low heat with other bedding. Do not tumble dry the pillow protector alone.
- Never use a heat setting above 125 degrees or over dry; this will weaken the fibers, damage the protective membrane and shorten the life of your pillow protector.
- Remove from dryer promptly.
- Do not iron.
- Do not dry clean.

WARNING

- Failure to follow these care instructions will void your pillow protector warranty.
